Moradabad, India | 📞 +91-7983110707 | ✉️ mohdfaisal7907@gmail.com | 🌐 Mohd Faisal | 📱 mohdfaisal-1

Professional Summary

B.Tech CS graduate (2026), with hands-on experience in Python, Android (Kotlin/Java), and published second-author research at ICTEM 2.0 (2026). Completed IBM virtual internship in Web & Mobile Development. Seeking a **Software Engineering** or **Developer** role to ship impactful products.

Education

Moradabad Institute of Technology
B.Tech in Computer Science and Engineering

2022–2026
Moradabad, India

Technical Skills

Languages & Framework: Java, Python, Kotlin, HTML, CSS, C#, Jetpack Compose
Concepts: OOP, REST APIs, Data Structures & Algorithms, MySQL, Client–Server Model, Software development lifecycle
Tools: Git, GitHub, Android Studio, VS Code, IntelliJ IDEA, Jetpack Compose

Research Publication

Campus Connect: Smart Android Platform for Student Engagement & Resource Sharing **Mar 2026**
Second Author · ICTEM 2.0 — 2nd Int'l Conference on Innovative Computational Techniques *MIT Moradabad*

- Architected and presented a centralized Android platform enhancing campus resource accessibility and student networking; paper accepted at ICTEM 2.0, Dept. of CS&E, MIT Moradabad (13–14 Mar 2026).

Projects

Minexa-AI Virtual Assistant 📄 | Python, SpeechRecognition, pyttsx3

- Modular voice-controlled desktop assistant that interprets spoken commands and triggers system-level actions — app control, web search, and file operations — in real time.

TaskFlow-Team Task Manager 📄 | Python, FastAPI, SQLite

- Built a production-ready full-stack team task management web application with role-based access control (Admin/Member) from scratch.

Campus Connect 📄 | Android, Kotlin, Firebase

- Campus social-networking app with real-time feeds, resource sharing, and event announcements; underlying research presented at ICTEM 2.0 (2026).

README.ai 📄 | Python, Flask, LLAMA

- Automated Repository Analysis. Intelligently scans project structure, languages, and dependencies.
- AI-Powered Content Generation. Uses an LLM to write coherent descriptions, installation steps, and usage instructions.

Weather App 📄 | Javascript, React.js, OpenWeatherMap API

- It fetches real-time weather data using the OpenWeatherMap API. You can search any city name and get its current weather conditions instantly.

Car Price Predictor 📄 | Python, Scikit-learn, Pandas

- This project takes the parameters of a used car like: Company name, Model name, Year of Purchase, Fuel Type and Number of Kilometers it has been driven. It then predicts the possible price of the car.

Hackathons & Competitions

FutureStack GenAI Hackathon 2025 **2025**
Participant *WeMakeDevs*

- AI-Powered Content Generation. Uses an LLM to write coherent descriptions, installation steps, and usage instructions. Automated Repository Analysis. Intelligently scans project structure, languages, and dependencies.

Certifications

- Android 14 & Kotlin – Udemy
- AI & Cybersecurity Awareness – tcsiON
- CS50: Introduction to Python – Harvard
- Foundations of Cybersecurity – Google
- Python Essentials 1 – Cisco
- Generative AI Essentials – tcsiON
- Manage Security Risks – Google
- Soft Skills – NPTEL
