Professional Summary

B.Tech CS graduate (2026), with experience in Android app Development, UI/UX Design, and AI-powered applications through academic projects. Skilled in Java, Kotlin, Python, Jetpack Compose, and Figma, with hands-on practice in designing modern mobile and web interfaces and building scalable software solutions. Published second-author research at ICTEM 2.0 and completed IBM Web & Mobile Development Internship. Seeking Software Engineering, Android Development, or Product Design opportunities.

Education

Moradabad Institute of Technology

B.Tech in Computer Science and Engineering

2022–2026

Moradabad, India

Technical Skills

Languages & Framework: Java, Python, Kotlin, SQL, C#.NET, Jetpack Compose

UI/UX: Figma, Material Design, Wireframing, Prototyping, Persona, User Flow, Design Systems

Concepts: OOP, REST APIs, Data Structures & Algorithms, Client–Server Model, Software development lifecycle

Tools: Git, GitHub, Android Studio, VS Code, IntelliJ IDEA

Research Publication

Campus Connect: Smart Android Platform for Student Engagement & Resource Sharing

Mar 2026

Second Author · ICTEM 2.0 — 2nd Int'l Conference on Innovative Computational Techniques

MIT Moradabad

- Architected and presented a centralized Android platform enhancing campus resource accessibility and student networking; paper accepted at ICTEM 2.0, Dept. of CS&E, MIT Moradabad (13–14 Mar 2026).

Projects

README.ai — GenAI web-app 📄 | Python, Flask, LLAMA

- Automated Repository Analysis. Intelligently scans project structure, languages, and dependencies.
- AI-Powered Content Generation. Uses an LLM to write coherent descriptions, installation steps, and usage instructions.

Trading-Bot — AI web-app 📄 | Python

- A complete, production-quality Python command-line application for placing orders on the Binance Futures Testnet (USDT-M).

Weather App — Web-app 📄 | Javascript, React.js, OpenWeatherMap API

- It fetches real-time weather data using the OpenWeatherMap API. You can search any city name and get its current weather conditions instantly.

TaskFlow — Web-app 📄 | Python, NLTK, NLP

- Built a production-ready full-stack team task management web application with role-based access control (Admin/Member) from scratch.

Campus Connect — Android App 📄 | Android, Kotlin, Firebase

- Final year group project: Campus social-networking app with real-time feeds, resource sharing, and event announcements; underlying research presented at ICTEM 2.0 (2026).

Hackathons & Competitions

FutureStack GenAI Hackathon 2025

2025

Participant

WeMakeDevs

- Built a GenAI-powered document(Readme file) generating tool which helps developers to write better readme file for any repository that leads to boost productivity & better document generation.

Internship & Experience

IBM — Web & Mobile Development

2025

Virtual Internship

- Completed a structured virtual internship focused on web and mobile application development through IBM SkillsBuild.
- Built a responsive Weather Application that fetches and displays real-time weather information using a weather API.

Certifications

- Android 14 & Kotlin – Udemy
- Generative AI Essentials – tcsiON
- Foundations of Cybersecurity – Google
- Introduction to Machine Learning – NPTEL
- Google UX Design – Coursera
- Web & Mobile Development – IBM
- AI & Cybersecurity Awareness – tcsiON
- Soft Skills – NPTEL
- Machine Learning – DUCAT
